PRETTY IS A PRACTICE INITIATIVE

Growing Together

# Bubble Trouble

*An entirely unnecessary amount of fun with soap and water.*

## The Bubble Recipe

- **2 cups lukewarm water** (helps the sugar dissolve quickly)
- **½ cup liquid dish soap** (a concentrated formula works well)
- **2 tablespoons granulated sugar**

## Make Some Magic

1. Stir the sugar into the lukewarm water until completely dissolved.
2. Gently add the dish soap and stir slowly. Avoid creating foam.
3. Cover and let the solution rest for several hours, preferably overnight.
4. Pour into a shallow tray and let the bubble-making begin!

## Let the Bubble Olympics Begin!

### The Big Show-Off
Who can make the largest bubble?

### The Long Goodbye
Whose bubble stays intact the longest?

### The Double Trouble
Can you make two bubbles touch without immediately popping?

### The Grand Finale
Who can create the most spectacular shower of bubbles?

*Award imaginary medals, dramatic applause or completely undeserved standing ovations.*

## Bubble Art!

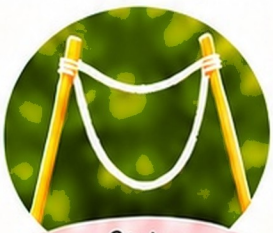

Turn your bubbles into artwork! Add a few drops of washable liquid watercolor or food coloring to your bubble solution, blow bubbles onto paper and watch colorful prints appear.

## Wand Workshop

Create bubble wands from simple household materials.

*Pipe Cleaner Shape*

*String Super Wand*

*Cookie Cutter Classic*

## PIAPI BUBBLE TIPS FOR BEAUTIFUL BUBBLES

- Use lukewarm water for quick dissolving.
- Let the solution rest for the best results.
- Stir gently to avoid foam.
- Try it on a calm day. Bubbles last longer with less wind.
