The Great Sound Hunt

An active listening adventure that turns everyday sounds into surprising discoveries, playful challenges and your own soundscape masterpiece.

1 Find the Mystery.

Close your eyes, if comfortable. Can you identify a sound without looking? What do you think is making it? What else could it be?

2 Catch a Sound in Disguise.

Find something that sounds like something else. Does the washing machine growl? Does the wind whisper secrets? Does a squeaky door sound offended?

3 Hunt the Almost-Invisible.

Find the faintest sound you can. Then discover the one that's been there all along without you noticing.

4 Steal a Rhythm.

Find a rhythm in your surroundings. Recreate it with taps, claps, humming or movement. Can someone guess its source?

5 Make Your Sound Safari Masterpiece.

Give your discoveries imaginative names and turn them into a colorful soundscape using words, lines, shapes and drawings. No rules for what a sound should look like!

Sound Safari Wildcard: Find a sound that makes you feel something. What does it remind you of? What would you name it if it belonged to you?

What was there all along that you had never really noticed?
